PROGRAM HIGHLIGHTS IN BRIEF

Each of Alvernia University’s Business programs examine the contemporary business world from both practical and ethical standpoints. Business majors combine classroom learning with real world knowledge through cooperative education experience. This broad-based approach prepares graduates to succeed professionally by developing the supervisory and managerial skills necessary for career advancement. Alvernia Business faculty have solid academic qualifications and years of business experience. They are in touch with the latest trends and issues in the business world.

Students in Human Resource Management develop an understanding of the components necessary to prepare for a career in the field, including positions in training, recruitment, compensation management and benefit analysis. Alvernia’s Human Resource Management students graduate with tools to develop and evaluate resources necessary to sustain a positive return of the people investment in an organization. The Business Department also offers several other business degrees, with specializations in accounting, marketing, sport management and management.
