

ADVISING WORKSHEET: ELECTRICAL ENGINEERING

GENERAL NOTES

- A minimum of 123 credits are required for graduation.
 - Credits earned for COM 100 and MAT 100 do not count toward the 123 credits required for graduation; however, COM 100 students may petition for elective credit.
 - Where appropriate, courses required for the major can be used to satisfy General Education requirements. However, the credits earned for these courses are applied to either Gen Ed requirements or the major, not both.
 - Paths of Knowledge coursework may count towards major or minor requirements, but may not fulfill Mid-Level Liberal Arts Exploration requirement.
 - Students are expected to follow the catalog requirements for General Education, the major, and additional requirements.
 - A minor or second major within the areas listed under Paths of Knowledge automatically fulfills that area of the Gen Ed requirements.

MAJOR NOTES

The Engineering majors (electrical, mechanical, and industrial) are fundamentally sound in math and science and application ready (i.e., ready and able to apply their knowledge to solve cutting-edge issues). This is accomplished by extensive fundamental math and science training and hands-on training in cutting-edge industry and labs. The key features of the engineering majors include a common core of engineering curriculum that allows exposure to all disciplines before selecting a major, four semesters of interdisciplinary design courses, and co-op or internship experience in an advanced industry or faculty applied research lab inclusive of professional mentoring.
