# Summer Programs at AU

## Free Summer Courses

Alvernia University is excited to offer incoming first-year students the opportunity to participate in free virtual summer courses before the start of the fall semester.

Designed specifically for new students, these brief and engaging courses allow students to begin their college journey early while connecting with classmates and faculty in a supportive environment.

These courses are designed to help students build confidence, explore interesting topics, and become familiar with the college experience before arriving on campus.

## Pre-Orientation Camps

Alvernia's Pre-Orientation Camps give incoming first-year students the opportunity to arrive on campus early, connect with other new students, and begin building their college experience before the semester starts.

Each camp offers a unique focus — from leadership and service to outdoor adventure and special interests — while helping students become comfortable with campus, meet new friends, and develop a strong sense of community.

Pre-Orientation Camps are designed to make the transition to college fun, meaningful, and memorable.
